

Declaration of Findings & Audit

Black King NF-e ↔ DAO Records Reconciliation

Prepared by: Sophia Truesight (autopilot) on behalf of TrueSight DAO · **Governor:** Gary Teh · **Thread:** 31905 “Black King Nota Fiscal and Taxes”

Date: 2026-09-18 · **Emitter under audit:** MATHEUS REIS PEREIRA — “Black King”, **CNPJ 50.042.585/0001-80**, Ilhéus/BA

Consignee of record: TRUETECH INC (foreign) — fiscal/billing address on the DANFE

1. Purpose and scope

This document declares the findings of a reconciliation between the **15 export NF-e** (Nota Fiscal Eletrônica) issued by **Black King** and recorded in DAO source data, and the **DAO’s own physical-arrival records** (the “arrival register”). The object is to give the accountant a defensible, single-source statement of which invoices correspond to goods that physically moved, which were cancelled/reissued, and which were issued but never shipped — and to state the DAO’s position on the outstanding Brazilian tax obligations and the proposed accountant engagement for the Black King CNPJ.

2. Sources reconciled

Source	Role in this audit
SEFAZ-BA “consulta emitente” pull	the 15 authoritative export NF-e + their 44-digit chave , status, value, date
Main Ledger <code>shipment_nfe</code> tab	NF-e # / chave / date / value / recipient / SEFAZ status / parcel-tracking binding
Main Ledger <code>offchain assets in transit</code> tab	the DAO arrival register — per-parcel tracking → destination → ledger line → status
<code>CORREIOS_SHIPMENTS.md</code>	Correios tracking index + shipping receipts + post-arrival holders
<code>black-king-nota-fiscal-raw</code> (DANFE PDFs)	full DANFE line items (products, weights, destinatario)

Key problem reconciled: the SEFAZ NF-e set and the DAO arrival register share **no common key**. The binding (tracking number ↔ NF-e) had to be constructed from DANFE line-item weights, Correios receipts and governor rulings.

3. Audit findings — reconciliation of the 15 NF-e

3.1 Register of all 15 Black King export NF-e

NF-e	Issue date	Value (R\$)	Recipient	SEFAZ	Tracking	State
1	2024-11-04	2,000.00	TRUETECH INC	Autorizada	CP340992695BR	arrived, no register row
2	2024-11-04	4,500.00	TRUETECH INC	Autorizada	CP340992687BR	arrived, no register row
3	2025-01-30	544.80	TRUETECH INC	Autorizada	CP340992735BR	linked — arrived
4	2025-02-19	2,362.00	TRUETECH INC	Autorizada	(blank)	issued, never shipped
5	2025-02-25	1,125.00	ANDREA CATALINA F. RIOS DE PABST	Autorizada	CP340993838BR	linked — arrived
6	2025-03-06	2,000.00	TRUETECH INC	Cancelada	NA	cancelled → reissued NF7
7	2025-03-06	2,000.00	TRUETECH INC	Autorizada	(blank)	never left Brazil — cancellation requested
8	2025-03-06	1,000.00	TRUETECH INC	Autorizada	CP340992761BR	linked — arrived

9	2025-03-06	500.00	AGNIESKA MARECKA	Autorizada	CP340993237BR	linked — arrived
10	2025-04-01	800.00	TRUETECH INC	Autorizada	74 4476 6210 (DHL)	linked — arrived
11	2025-04-28	500.00	TRUETECH INC	Autorizada	CP340993988BR	linked — arrived
12	2025-06-04	466.71	TRUETECH INC	Autorizada	CP340993869BR	linked — arrived
13	2025-06-20	2,250.00	TRUETECH INC	Cancelada	NA	cancelled → reissued NF14
14	2025-06-20	2,250.00	TRUETECH INC	Autorizada	CP340993299BR	linked — arrived
15	2025-09-23	1,000.00	TRUETECH INC	Autorizada	(blank)	never left Brazil — cancellation requested

3.2 Reconciliation summary

NF-e state	Count	NF-e
Linked to an arrived parcel	8	3, 5, 8, 9, 10, 11, 12, 14
Arrived, but no DAO register row	2	1, 2
Issued but never shipped	3	4, 7, 15
Cancelled / superseded (cancel-and-reissue)	2	6→7, 13→14
Total	15	

Reconciliation integrity check (passes): NF3 declares **27.24 kg** of cacao nibs; the arrival register binds tracking CP340992735BR to **120 × 8 oz (227 g) kraft pouches = 27.24 kg**. The join reconciles on weight, not merely on tracking.

Cancelled/reissued pairs: NF6→NF7 and NF13→NF14 are cancel-and-reissue pairs (same value, same issue date). The R\$4,250 across the two cancelled originals is **duplicated, not lost cargo**.

Non-Black-King rows correctly excluded: the arrival-register parcel CP327946643BR (AGL6 consignment) is billed under a **different emitter's** NF-e set — **Coopercabruca NF-e Nº 888** (CNPJ 31.948.811/0001-42) — and is therefore **outside** the Black King scope (it has no Black King NF-e by design, not by omission).

4. Declaration — NF-e 7 and NF-e 15: cancellation for non-shipment

*We declare that Nota Fiscal Eletrônica Nº 7 and Nota Fiscal Eletrônica Nº 15 have been sent to the accountant for **CANCELLATION**, on the ground that the shipment never left Brazil. Neither invoice corresponds to goods that exited the country; both are issued against parcels with **no tracking number, no FDA prior notice, and no shipping receipt**.*

NF-e	Issue date	Value (R\$)	Chave de acesso (44 digits)
7	2025-03-06	2,000.00	29250350042585000180550010000000071061000061
15	2025-09-23	1,000.00	29250950042585000180550010000000151061000065

Corroborating facts. NF7 is the reissue of the already-cancelled NF6 (both 06/03/2025, R\$2,000, 40 × 500 g bars) — with NF6 cancelled and NF7 never shipped, the underlying transaction did not occur. NF15 (20 × 500 g bars, 23/09/2025) was issued roughly six weeks after the US de-minimis suspension (EO-14324, effective 2025-08-29); the post-cutoff lane produced no prior notice and no shipment. Both fall in the audit's "issued, never shipped" class alongside NF4 (R\$2,362, 19/02/2025), which remains likewise unshipped.

Requested treatment: cancel NF7 and NF15 with SEFAZ; the corresponding declared revenue is to be reversed/removed from the Black King tax base for those periods.

5. Declaration — Brazilian tax position on the Black King CNPJ

Context (the hurdle). Black King (MATHEUS REIS PEREIRA, CNPJ 50.042.585/0001-80, Ilhéus/BA) currently shows **SITUAÇÃO CADASTRAL: INAPTO** since **08/06/2026**, motivo **"Omissão de Declarações"** (unfiled returns), and the company's **e-CNPJ digital certificate expired in early June 2026**. Both block issuance of export NF-e and, with it, the export lane. This is the live operational hurdle to be cleared.

With the goal of clearly resolving the hurdles, the DAO will proceed to pay the portion of the taxes owing to the Brazilian government by Black King for the period since the DAO began utilising Black King infrastructure — a period in which no transactions other than those of the DAO passed through the Black King CNPJ, other than via Nota Fiscal.

In plain terms: from the first Black King export NF-e (**04/11/2024**) to the present, the Black King CNPJ has been used **solely as a conduit for DAO-sourced transactions** recorded via nota fiscal. The DAO therefore accepts responsibility for the tax attributable to that activity and will fund the regularisation, including: (1) filing the omitted declarations to return the CNPJ to **ATIVA**; (2) renewing the **e-CNPJ** digital certificate; (3) restoring NF-e credentialing at **SEFAZ-BA** so the export lane reopens.

Attribution of profit (governor clarification). *Any profit attributable to the note fiscal has been paid through the purchase of cacao* — i.e. the economic benefit of the Black King NF-e activity has already been transmitted to the DAO via the underlying cacao purchases, so the residual liability to be settled is the **tax/declaration** component, not a retained Black King profit.

6. Proposal — Retain accountant services for the Black King CNPJ

*We will submit, as a proposal, the retention of accountant services for the Black King CNPJ (50.042.585/0001-80) on a monthly basis of **R\$500** — on the condition that no transactions other than those associated with the DAO will pass through the Black King CNPJ.*

Term	Detail
Scope	Monthly accounting & compliance for Black King CNPJ 50.042.585/0001-80
Fee	R\$ 500 / month
Condition precedent	No transactions other than DAO-associated transactions may pass through the Black King CNPJ
Rationale	Keeps the CNPJ clean, filing-current and export-NF-e-credentialed, so the DAO's cacao export corridor via Black King remains compliant
Benefit	Prevents recurrence of the “Omissão de Declarações” → INAPTO failure mode

7. Outstanding items

Item	Status
NF7, NF15 cancellation at SEFAZ	Requested (this declaration); pending accountant action
NF4 (R\$2,362) — issued, never shipped	Open — same class as NF7/NF15; governor to confirm treatment
NF1, NF2 — arrived per Correios, no register row	Open — governor leaned “perhaps ignore”; no register rows added
Black King CNPJ reinstatement (declarations + e-CNPJ + SEFAZ-BA)	Open — runbook needed
Accountant retention (R\$500/month)	Proposed (this declaration); pending governor submission
Awaiting 2025 Exporta Fácil AWBs from Matheus	Open — the only deterministic key for NF4/NF7 tracking, if such parcels exist

8. Declaration

The findings in Sections 3–7 are drawn directly from the SEFAZ-BA emitente pull and the DAO's own ledger/arrival records, as itemised above. Every NF-e chave cited is the full 44-digit **chave de acesso**, so each statement is independently verifiable against SEFAZ.
