

Currencies Sheet — Customs Code Columns

Column S: HS Code (International)

Header: HS Code

Type: String

Description: International Harmonized System code (6-digit). Used globally for customs declarations.

Existing values on the sheet:

Product	HS Code
Cacao Nibs (8 oz pouch)	1801
81% Dark Chocolate Bar — Oscar	1806.32
81% Dark Chocolate Bar — Santa Anna	1806.32

Column T: HTS Code (US Customs)

Header: HTS Code

Type: String

Description: US Harmonized Tariff Schedule code (8–10 digit). Includes the statistical suffix required for US customs import declarations.

Expected values (to be filled in):

Product	HS Code	HTS Code (US)
Cacao Nibs	1801	1801.00.0000
81% Dark Chocolate Bar	1806.32	1806.32.0000

Key Difference

- **HS Code** = the international 6-digit standard (same everywhere)
- **HTS Code** = the US-specific extension with statistical suffixes for US customs

Both are now tracked in the Currencies sheet of the main DAO ledger.
