

Chocolate Mold Supplier Comparison

Cabrellon (Italy) vs Chinese Manufacturer Quotation

Prepared by: TrueSight DAO Autopilot

Date: April 2026

1. Background

A Chinese factory quotation for polycarbonate chocolate molds was compared against Cabrellon srl (Vicenza, Italy), a 60-year-old Italian mold maker. The question: are the outputs similar?

2. The Chinese Quotation (Attachment)

Detail	Value
Product codes	MHC-CL082, MHC-TL-001, MHC-TL-002
Material	Polycarbonate (PC), food-grade
Products	Chocolate bar molds, transparent voting tool molds, colored chocolate bar molds
Pricing	RMB (reference rate 1:6.78 RMB:EUR)
Payment	30% deposit / 70% before shipment
CE certification	Pending — not yet obtained
Lead time	16–20 days
Customization	Yes — patterns, cavities, specs

3. Cabrellon (Italy)

Detail	Value
Founded	60 years in business
Location	Longare, Vicenza, Italy
Materials	Polycarbonate (Bayer/SABIC), Tritan Renew (BPA-free)
Certifications	ISO 9001 (DNV certified), FDA-approved materials
Product range	1,500+ standard designs — pralines, bars, Easter eggs
Customization	Full in-house design and production

Detail	Value
BPA-free	Yes — transitioning ahead of 2028 EU ban

4. Comparison: Output Similarity

Aspect	Chinese Supplier	Cabrellon	Match?
Material	Food-grade PC	Food-grade PC (Bayer/SABIC)	■ Same category
Product type	Chocolate bar molds, custom cavities	1,500+ designs including bars & pralines	■ Same category
Customization	Yes	Yes (in-house)	■ Both offer
Polycarbonate construction	Yes	Yes	■ Same
CE certification	■ Pending	■ ISO 9001	■ Not equivalent
BPA-free option	Not mentioned	■ Tritan Renew	■ Different
Origin	China	Italy	■ Different

5. Verdict

The finished output — the physical chocolate mold — is very similar.

Both produce rigid polycarbonate cavity molds for professional chocolate making. If you held a finished mold from either supplier, you would be hard-pressed to tell them apart by look and feel alone.

The difference is in process and pedigree:

- **Cabrellon** offers certified quality (ISO 9001, FDA), a 60-year track record, and is already transitioning to BPA-free materials ahead of the 2028 EU ban. Premium European option.
- **The Chinese supplier** likely offers a lower price point but lacks CE certification and has no stated BPA-free roadmap.

Decision factors:

1. **Certification requirements** — Do your target markets require CE/ISO?
2. **BPA-free compliance** — If selling into EU post-2028, Cabrellon is ready
3. **Volume pricing** — Chinese supplier likely cheaper per unit
4. **Lead time** — 16–20 days vs Italian production timeline
