

Partner Events Monitoring — Implementation Plan

Date: 2026-06-12 | **Author:** Sophia (TrueSight DAO Autopilot)

1. Vision

Sophia monitors newsletters from Agroverse's retail and ecosystem partners, extracts events (talks, workshops, ceremonies, retreats), and maintains a curated, living events listing on **agroverse.shop/events**.

Site split clarified:

- **agroverse.shop** — community-facing. Events listing lives here.
- **truestight.me** — DAO hub. Governance, metrics, ops only.

> "Anyone keen to find out more about what's going on in our ecosystem can just reference the Agroverse landing page." — Gary

> "And I think this would naturally feed into the monthly newsletter that we sent out to folks who left their emails when they bought the QR code. So then it becomes a self-reinforcing loop." — Gary

2. The Self-Reinforcing Loop

This isn't just a linear pipeline — it's a compounding flywheel that connects three existing DAO growth surfaces:

...

PARTNER EVENTS → NEWSLETTER LOOP

Partner sends newsletter

|

v

Sophia extracts events

|

v

Events listed on agroverse.shop/events

|

v

Monthly newsletter to QR-code buyers ■■■ Email360 Retention

|

v

Buyers see partner events near them

|

v

Buyers attend events at partner spaces

|

v

Attendees scan QR codes on cacao bags ■■■■ QR Trace-Back Loop

|

v

More trees financed → more subscribers

|

■■■■→ back to monthly newsletter ■■■■

PARTNER BENEFITS (compounds back)

Partners get foot traffic from newsletter

|

v

Partners restock cacao more frequently

|

v

Partners refer other venues ■■■■ feeds B2B Sales Loop

|

v

New partners onboarded → new newsletters → cycle continues

...

How the loops connect to the Growth Model

Growth Model Loop	How this feeds it
Email360 Retention Loop	Newsletter gets richer content → higher engagement → more re-purchases
QR Trace-Back Loop	Event attendees scan bags → trees financed → more subscribers
B2B Sales Loop	Partners see foot traffic → more likely to restock + refer peers
Retail Partner Referral Loop	Satisfied partners refer venues → new partners → more events

Key insight: The events listing is the bridge between the physical partner space and the digital retention surface. It turns a one-way content pipeline into a compounding flywheel.

3. Architecture

...

Partner Newsletter (email)

|

v

admin+sophia@truesight.me ■■■ Partners subscribe this address

|

v

Sophia scans inbox (Gmail API)

- Detects newsletters by sender domain
- Extracts events (date, title, location, description, link)
- Deduplicates against existing events list

|

v

AGROVERSE_AFFILIATED_EVENTS.md ■■■ Canonical events file

|

v

Events rendered on agroverse.shop/events

- Filterable by date / location / partner
- Each event links back to partner's original listing

|

v

Community discovers & attends

|

v

(feeds back into monthly newsletter → loop)

...

4. Phased Roadmap

Phase 1 — Foundation (MVP)

Partner Events Monitoring — Implementation Plan

Goal: One partner (SF Zen Center) → one events file → manual review → agroverse.shop/events.

Step	What	Est. time
1.1	Create canonical events file	15 min
1.2	Seed with SFZC events from June 11 newsletter	20 min
1.3	Set up inbox monitoring for admin+sophia@truesight.me	Built-in
1.4	Build events extraction prompt	30 min
1.5	Add /events page to agroverse_shop_beta	1–2 h
1.6	Gary reviews first batch, approves, goes live	Ongoing

Deliverable: agroverse.shop/events showing SF Zen Center's upcoming programs.

Phase 2 — Multi-Partner Expansion

Goal: Each partner subscribes admin+sophia@truesight.me → events auto-extracted.

Step	What
2.1	Partner newsletter registry (JSON or sheet mapping partner → sender email)
2.2	Onboard partners — subscribe admin+sophia@truesight.me to their newsletters
2.3	Multi-sender detection — scan for ALL registered senders
2.4	Convert to structured JSON (ecosystem-events.json) for dynamic page fetch
2.5	Add filter/sort UI (date, partner, location)

Deliverable: Events from 3–5 partners auto-populated on agroverse.shop/events, filterable.

Phase 3 — Automation & Discovery

Step	What
3.1	Auto-detect new newsletter senders (Sophia flags unknown retail newsletters)
3.2	Auto-archive past events
3.3	Calendar export (iCal feed)

Step	What
3.4	Partner dashboard (event view counts)

5. Events Schema

Each event entry:

- **id:** sfzc-2026-07-25-radical-kindness
- **title:** "Radical Kindness: The Metta Sutta as a Way of Living"
- **partner:** "San Francisco Zen Center"
- **date_start:** "2026-07-25"
- **date_end:** "2026-08-15"
- **time:** "8:30–10:00 am PT"
- **location:** "Online"
- **location_type:** online | in_person
- **description:** Short blurb
- **url:** Link to partner's original listing
- **status:** upcoming | ongoing | past
- **source:** newsletter-2026-06-11
- **added_at:** "2026-06-12"

6. Partner Onboarding Checklist

1. ☐ Partner subscribes admin+sophia@truesight.me to their newsletter
2. ☐ Sophia detects the first newsletter arrival
3. ☐ Sophia adds partner to the registry
4. ☐ Sophia extracts events and presents for review
5. ☐ Gary approves the first batch
6. ☐ Events go live on agroverse.shop/events
7. ☐ Ongoing: Sophia monitors future newsletters from this sender

7. First Seed — SF Zen Center Events

Upcoming Events

Date	Event	Location
Jun 12	Sacred Rhythms: Butoh	City Center
Jun 13	GRIP: Peace & Accountability	City Center
Jun 13	All Day Sitting w/ Norman Fischer	Green Gulch
Jun 14	Sunday Tea Gathering w/ Meiya Wender	Green Gulch
Jun 16–21	Step Into Your Life Retreat	Tassajara
Jun 19	Juneteenth Holiday	City Center
Jun 20	Summer Solstice Ceremony	City Center
Jun 20	One-Day Sitting w/ Guo Gu	Green Gulch
Jun 21	Living Into the Appropriate Response	City Center
Jul 19	In the Rhythm of the Heart	Green Gulch
Jul 25–Aug 15	Radical Kindness: The Metta Sutta	Online
Jul 30–Aug 2	Joyful Ease, Your Own True Body	Green Gulch

Recurring Events

Day	Event	Location
Thu	Drop-in Practice Session	Online
Thu	Trans Sangha	City Center
Thu	Informal Zazen & Tea	City Center
Fri	Meditation in Recovery	Online
Sat	Saturday Sangha	City Center
Sat	Queer Dharma Group	Online
Mon	Meditation in Recovery	City Center/Online
Tue	Young Urban Zen	City Center

8. Open Questions (resolved)

- Where on the site?** → agroverse.shop/events (Gary confirmed). truesight.me is governance/ops only.
- Review gate?** Phase 1: manual review. Phase 3: auto-publish with "suggested" flag.
- What counts as "Agroverse-affiliated"?**
 - Events by retail partners who carry Agroverse cacao
 - Events by ecosystem partners (SFZC, capoeira, BE, Vipassana)

- Events where Agroverse is participating
- Mission-aligned events (compassion, rainforest, community)

4. **Recurring events?** Listed as "ongoing" with link to partner's calendar.

5. **Privacy?** Always link back to partner's original listing. We're a directory, not a ticket seller.

9. Success Metrics

Metric	Phase 1 Target	Phase 3 Target
Partners monitored	1 (SFZC)	10+
Events listed	15+	50+ live
Detection latency	< 1 hour	< 15 min
False positive rate	< 20%	< 5%

10. Files to Create

File	Location	Purpose
AGROVERSE_AFFILIATED_EVENT S.md	agentic_ai_context/	Canonical events list
PARTNER_EVENTS_REGISTRY.md	agentic_ai_context/	Partner → sender mapping
ecosystem-events.json	agroverse-inventory/	Machine-readable feed for agroverse.shop/events

11. Execution Checklist

Phase 1 — Foundation

- [] 1.1 Create AGROVERSE_AFFILIATED_EVENTS.md with schema + seed data
- [] 1.2 Create PARTNER_EVENTS_REGISTRY.md with SFZC entry
- [] 1.3 Build newsletter detection into autopilot inbox monitoring
- [] 1.4 Build events extraction prompt
- [] 1.5 Add /events page to agroverse_shop_beta (beta first, then promote to prod)
- [] 1.6 Gary reviews first batch, approves, goes live

Phase 2 — Multi-Partner

- [] 2.1 Subscribe admin+sophia@truesight.me to 3–5 partner newsletters

- [] 2.2 Build ecosystem-events.json feed
- [] 2.3 Add filter/sort UI
- [] 2.4 Verify multi-sender detection

Phase 3 — Automation

- [] 3.1 Auto-archive past events
- [] 3.2 Auto-detect new newsletter senders
- [] 3.3 Calendar export (iCal)
- [] 3.4 Partner dashboard

Filed 2026-06-12 by Sophia. Awaiting GO signal from Gary to begin Phase 1.
