

Aora × Agroverse Cacao Rainforest Adventure — Event Brief

Compiled by Sophia Truesight | July 2025

1. Strategic Framework

Philosophy: TED content quality + TEDx replication model + Mystic Manor immersive storytelling + Aora IP

Core Principle: "We are not planning an isolated event. We are building a configurable engine for immersive children's educational activities. The skeleton is fixed, the content is variable."

Replicability: After cacao, new Aora nature spirits will debut for tea, honey, cotton, and other themes. Same skeleton, variable theme, consistent quality.

2. The Narrative

- **Gary** = Guardian of the Cacao Rainforest — a true explorer, owns the real story
- **Aora Kuku** = the first Aora nature spirit discovered in the cacao rainforest, the clue character
- **Children** create their own Aora companion online → bring it to Gary's rainforest → follow Aora Kuku's trail → experience the journey → meet Gary and hear his true story

3. The Closed Loop: Online → Onsite → Online

Phase 1 — Online Pre-Heat (1-2 weeks before):

- Children create their exclusive Aora companion on the AORA website
- System generates a first draft 12-panel digital picture book
- Gary records a 60-second video: "The Story of Aora Kuku and Me"
- Cacao Explorer Gift Set preview is released

Phase 2 — Onsite Core Experience (~90 minutes):

- Identity transformation at the Aora Certification Station
- 7-act immersive adventure (see below)
- Children make chocolate by hand
- Gary shares his true story at the Starlit Campfire

Phase 3 — Online Continuation (1-2 weeks after):

- Children create a new "Cacao Rainforest Adventure" chapter for their Aora
- Gift Set delivery — QR code on character card links to latest picture book
- Community operations: unboxing videos, family challenges

4. The 7 Acts (Onsite Flow)

Act	Duration	Core Experience
Prologue: Gathering of Explorers	15-20 min	Queue area atmosphere; Aora Certification Station; Gift Set preview; Gary's welcome
Act One: The Rainforest Gate	—	Gary opens the curtain; rainforest sound effects; children enter the exploration area
Act Two: Sensory Rainforest (Agroforestry Module)	—	4 sensory stations: smell cacao, touch moss/bark/fungal networks, see microbial world, hear rainforest animals
Act Three: Expedition Team Formation	—	Children send their Aora into the rainforest (scan/paste on backdrop wall) — become expedition members
Act Four: The Great Bean Adventure (Supply Chain Module)	~28 min	Large floor board game — children play as a cacao bean, make Fair Trade choices at the Fork Road
Act Five: The Magic Workshop	—	Make chocolate by hand using Fair Trade cacao liquid; Gary quietly joins in
Act Start: Starlit Campfire	—	Gary shares his true story with Aora Kuku — the emotional climax
Epilogue: Continuing the Adventure	—	Box up chocolate, award certificates, photos, goodbye. Reminder to continue online

5. The Great Bean Adventure — Supply Chain Board Game

Duration: ~28 minutes (first round 18 min + second round free choice 10 min)

Players: 15 children simultaneously

Size: ~4m × 3m floor map

6 Stations:

1. Opening + "Little Bean Departure Song" (~2 min)
2. Bubble Bath Station — Fermentation (~3 min)
3. Sunny Beach Station — Drying (~3 min)
4. Bean Dash Station — Transport (~3 min)
5. Bean Fork Road — Card Choice (~4 min)
6. Magic Transformation Station — Chocolate Factory (~3 min)

The Fork Road — Core Design:

- **Green cards** (cacao leaf) = Fair Trade / cooperative model: more process, more waiting, but stable farmer incomes
- **Orange-yellow cards** (cacao bean) = commodity / middleman model: faster pace, but price drops and instability
- Non-judgmental — both paths exist in the real world; children discover differences through experience

6. The Cacao Explorer Gift Set

Contents: Chocolate mold, Fair Trade cacao liquid starter pack, exploration tools, exclusive Aora character card with QR code

QR Code Function: Links to the child's latest Aora picture book — a complete closed loop of Online Creation → Offline Experience → Online Continuation

7. Technical Solution — 4-Tier Fallback Strategy

Plan	Equipment	Positioning
1A	Professional projectors, multiple scenes	Ideal High-Spec
1B	Professional projectors, pragmatic	Pragmatic Medium
1C ■	1 projector + venue screen + laptop + wall collage	Recommended
1D	Venue screen + laptop + PPT slideshow + physical backdrop	Ultimate Fallback (zero risk)

Decision Logic: Lock in 1C if 6 scenes are deliverable by July. Prepare 1D materials as parallel insurance. 1A/B are for long-term consideration only.

8. Key People

Role	Person	Responsibility
Guardian of the Cacao Rainforest	Gary	Owns the true story; appears at climax
TEDxSSL Operator	Liz	Sets tone, controls brand quality & replicability
Educational Advisor	Teacher Evan	Educational methods & credibility (no onsite execution role)
Market Signal	Dr Ye	Primary market insight — shapes final product & program

Role	Person	Responsibility
Program Runner (Option 1)	Jerri	Works for Liz; runs the program if Liz assigns
Program Runner (Option 2)	Zach Roth	US-based, willing to relocate to China long-term

9. Event Details

- **Timing:** Mid-to-late July (pending three-party confirmation)
- **Audience:** 10-15 seed families (parents + children aged 6-12), co-invited by Teacher Evan and Liz
- **Venue:** Controllable indoor space with AC (essential for July heat/rain)
- **Risk Management:** 15 risk registrations, 4-tier fallback, backup plan if Gary cannot attend, 3-track import plan, 10% contingency budget

10. Long-Term Vision

> "After cacao, new Aora nature spirits will debut in new themed adventures. The skeleton remains unchanged; the theme is variable; the quality is consistent; the characters are ever-new."

Each partnering brand gets its own exclusive Aora nature spirit — the emotional connection symbol between that brand and children.
