

Friends of the Rainforest — Landing Page & QR Placard

Date: 2026-06-12 | **Author:** Sophia (TrueSight DAO Autopilot)

1. Vision

When someone tastes Agroverse ceremonial cacao or cacao tea at an event, they scan a QR code on the placard and land on **agroverse.shop/friends-of-the-rainforest**. The page welcomes them as a "Friend of the Rainforest", tells the farmer's story, captures their email, and offers a way to bring the experience home.

This feeds directly into the Partner Events → Newsletter loop: emails captured here enter the monthly newsletter, which includes partner events, which drives more sampling, which captures more emails.

2. The Loop

...

Event attendee tastes cacao

|

v

Scans QR on placard

|

v

Lands on agroverse.shop/friends-of-the-rainforest

|

+---> Leaves email --> enters Email360 newsletter

| --> newsletter includes partner events

| --> attends next event --> scans again --> loop

|

+---> Buys cacao --> scans QR on bag

--> tree financed

--> more subscribers

--> loop

...

3. Phased Roadmap

Phase 1 — Landing Page

Step	What
1.1	Create friends-of-the-rainforest/index.html on agroverse_shop_beta
1.2	Build hero section: "You just became a Friend of the Rainforest"
1.3	Story section: Oscar's ceremonial cacao + Paulo's cacao tea
1.4	Email capture form: name + email
1.5	CTA to shop: links to ceremonial cacao and cacao tea product pages
1.6	Mobile-responsive design
1.7	GA4 + Facebook Pixel tracking
1.8	Deploy to beta.agroverse.shop

Phase 2 — QR Code & Placard

Step	What
2.1	Generate QR code DTS_FR_20260613_1
2.2	Design placard with QR + CTA
2.3	Print for tomorrow's event (June 13)

Phase 3 — Newsletter Integration

Step	What
3.1	Wire email captures into monthly newsletter list
3.2	First newsletter includes "Welcome Friends of the Rainforest" section

4. Page Content Draft

Hero

> You just became a Friend of the Rainforest.

>

> What you drank today came from deep in the Amazon — regenerative ceremonial cacao grown by Oscar in Bahia, and cacao tea crafted by Paulo in Para. Every bag of this cacao plants a tree in the forest that made it.

The Story

> **Oscar's Ceremonial Cacao** — Grown in the shade of the Atlantic Forest in Bahia, Brazil. Oscar has been farming this land for generations, using regenerative practices that restore the soil and protect the watershed.

>

> **Paulo's Cacao Tea** — From the heart of Para, Paulo harvests wild cacao from the forest floor. His tea is a celebration of the Amazon's biodiversity.

The Invitation

> **Stay connected to the forest.**

>

> Leave your email and we'll send you stories from the farms, updates on the trees you help plant, and invitations to events like this one.

>

> [Name] [Email] [Become a Friend]

The CTA

> **Bring the taste home.**

>

> [Shop Ceremonial Cacao] [Shop Cacao Tea]

5. QR Code Spec

Field	Value
QR ID	DTS_FR_20260613_1
Pattern	{EVENT}_{PAGE}_{DATE}_{BATCH}
Destination	https://agroverse.shop/friends-of-the-rainforest

6. Placard Design

Small tent card (approx 5" x 7" folded) placed next to the cacao flasks.

Front (facing attendees)

...

Friend of the Rainforest

[QR CODE]

Scan to meet the farmer
who grew what you drank

One sip plants a tree.

...

Back (facing the pourer)

...

Ceremonial Cacao - Oscar's Farm, Bahia

Cacao Tea - Paulo's Farm, Para

Each bag plants a tree
in the Amazon rainforest.

...

7. UAT Checklist

Landing Page

- [] U1. Page loads at beta.agroverse.shop/friends-of-the-rainforest
- [] U2. Hero text renders correctly on desktop
- [] U3. Hero text renders correctly on mobile (375px)
- [] U4. Story section displays both cacao stories
- [] U5. Email capture form accepts name + email
- [] U6. Email submission writes to correct list
- [] U7. Success message shows after submission
- [] U8. CTA buttons link to correct product pages
- [] U9. All images load
- [] U10. GA4 pageview event fires
- [] U11. Facebook Pixel PageView fires
- [] U12. Mobile-responsive (no horizontal scroll)
- [] U13. Page loads in < 3 seconds on 4G

QR Code

- [] U14. QR code scans correctly
- [] U15. QR code lands on correct URL

- ☐ U16. QR code is 300 DPI for print

Placard

- ☐ U17. Text readable from 3 feet
- ☐ U18. QR code min 2cm x 2cm
- ☐ U19. Placard stands stably next to flasks

8. Execution Checklist

Pre-Build

- ☐ Gary approves content draft
- ☐ Gary confirms QR destination URL
- ☐ Gary confirms CTA text

Build (Phase 1)

- ☐ Create friends-of-the-rainforest/index.html on agroverse_shop_beta
- ☐ Build hero section
- ☐ Build story section
- ☐ Build email capture form
- ☐ Build CTA section
- ☐ Add GA4 + Facebook Pixel
- ☐ Test mobile responsiveness
- ☐ Push to agroverse_shop_beta
- ☐ Verify at beta.agroverse.shop/friends-of-the-rainforest

Build (Phase 2)

- ☐ Generate QR code DTS_FR_20260613_1
- ☐ Design placard
- ☐ Print for tomorrow's event

Post-Launch

- ☐ Gary reviews beta page
- ☐ Gary approves promotion to prod
- ☐ Sync beta to prod
- ☐ Monitor email signups
- ☐ First email to new Friends

Filed 2026-06-12 by Sophia. Awaiting GO signal from Gary to begin Phase 1 build.
