

GACC Registration Requirements — CEPOTX to China (Dongguan)

Prepared for Jerri / Ling — 17 June 2026

Overview

Every food item imported into China requires the manufacturer to have a GACC registration number from China Customs. One product, one registration. Without it, customs clearance cannot proceed.

Effective regulation: GACC Decree No. 280 (effective June 1, 2026), replacing Decree No. 248.

Key change: Under Decree No. 280, unroasted cocoa beans have been removed from the "Official Recommendation" list. Cocoa/cacao products now follow **Pathway 2: Self-Application Registration** — no recommendation letter from MAPA needed.
