

## Handoff Document: Gary → Fatima

**From:** Gary Teh

**To:** Fatima Toledo

**Date:** July 15, 2026

**Subject:** Brazil Operations Handoff — WhatsApp Blackout Period

### 1. Context

I am traveling to China and will be mostly unable to access WhatsApp. This document hands off the active Brazil operations to you for the duration. Orlantides has been briefed and is your primary on-the-ground contact.

### 2. Critical Blocker: Nota Fiscal (Matheus / SEBRAE)

**Status:** Matheus is still waiting on SEBRAE to issue the Nota Fiscal. It has been over a month.

**What's needed:**

- Orlantides is already chasing Matheus on this. Follow up with Orlantides to ensure it gets resolved.
- The delay is blocking two critical decisions (see below).

**Impact if unresolved:**

- Cannot evaluate Vivi's cacao or decide on Coopercabruca purchase volume
- Cannot send chocolate molds from China
- Disrupts operations in both the US and China

### 3. Pending Decision #1: Vivi's Cacao — Stocking Decision

**Who:** Vivi (introduced via Mestre Bico Duro, capoeira master in Itacaré)

**What's needed:** Kirsten to evaluate the **flavor profile** of Vivi's cacao beans once they arrive in San Francisco

**Outcome:** Determines how much we buy from Coopercabruca this season

**Action for you:** Coordinate with Kirsten on the taste evaluation timeline. Follow up with Orlantides — he can also talk to Vivi directly.

### 4. Pending Decision #2: Chocolate Bar Production Location

**Who:** Santos (Itabuna), Kirsten (San Francisco)

**What's needed:** The current freight (handled by Matheus) must arrive in San Francisco so Kirsten can assess the **condition of Santos' 100% chocolate bars**

**Decision tree:**

| Condition of bars upon arrival | Action                                                                                                          |
|--------------------------------|-----------------------------------------------------------------------------------------------------------------|
| Good condition                 | Produce bars directly at Santos (Itabuna)                                                                       |
| Damaged in transit             | Santos produces base material → Kirsten converts to bars in SF → find a China-side partner for final conversion |

**Action for you:**

- Complete the conversation with Santos about **how many chocolate molds are needed to produce 100 kg of bars per pallet** for China and US partners
- Once bars arrive in SF, coordinate with Kirsten on condition assessment
- Report back on which production path we take

## 5. Oscar — Fazenda Bahia (Cooperative)

**Status:** Oscar has confirmed he will join the cooperative. He has known Orlantides for 40+ years and is the brother of a Coopercabruca co-worker.

**Note:** US market loves Oscar's cacao — rated higher than Fazenda São Jorge. Fazenda Santa Anna is also well-liked.

**Action for you:** No immediate action, but keep in touch with Orlantides on Oscar's integration.

## 6. Kirsten's Current Inventory (San Francisco)

- 28 bars São Jorge chocolate
- 1 bar Oscar chocolate
- 3 packs cacao nibs

## 7. Orlantides — Forward Role

Going forward, push free farmers to Orlantides so he handles all administrative stuff on his end. This eliminates the Matheus bottleneck for future operations.

## 8. Key Contacts

| Name       | Role                                  | Notes                                         |
|------------|---------------------------------------|-----------------------------------------------|
| Orlantides | On-ground coordinator (Bahia/Itacaré) | Primary contact for NF, farmers, logistics    |
| Matheus    | Bahia Coop                            | Nota Fiscal bottleneck — chase via Orlantides |
| Kirsten    | SF operations                         | Taste profiling, bar condition assessment     |
| Santos     | Itabuna production                    | Mold quantity conversation pending            |
| Vivi       | Farmer (Bico Duro connection)         | Cacao evaluation pending                      |
| Oscar      | Fazenda Bahia                         | Joining cooperative                           |

### 9. Summary of Your Action Items

1. **Follow up with Orlantides** on chasing Matheus for the Nota Fiscal
2. **Complete Santos mold quantity conversation** (100 kg/pallet)
3. **Coordinate with Kirsten** on Vivi's taste evaluation timeline
4. **Assess bar condition** once freight arrives in SF → decide production path
5. **Push new farmers to Orlantides** for direct admin handling
