

Pará Farm Dossier — Tree Age, Size, Variety & Back-Stories

Compiled 2026-09-30 (Sophia Truesight) · CEPOTX network, Transamazônica / Xingu, Pará, Brazil

Sources: FSVP site-visit reports (`fda\_fsvp`), `farm\_media\_manifests` (item-level transcripts), SunMint plot registry, CEPOTX site-code registry

Scope & how to read this

Covers the farms visited on the recent Pará swing (Aug–Sep 2026) across the **CEPOTX** network (COOPOXIN / COPOPS / COOPCAO / Copical). **Tree ages and varieties are farmer-attested narration, not lab-verified data.** All 22 `farm\_media\_manifests` files were swept item-by-item (English + Portuguese transcriptions, descriptions, plot metadata). Only **3 of 10 farms** carry any age figure — the rest are honest blanks.

PART A — Tree-age evidence, clip by clip

1 · Sítio Cacau na Veia — N-06-37 (COOPCAO · Pacajá)

Clip	Transcription	Reading
IMG_9538.MOV	"Olhe a árvore de cacau, que eu acho que é mais de 40 anos . Verso o outro árvore nativo, que também é mais de 40 anos."	Cacao >40 yr ; all trees planted at once; natives also >40 yr
IMG_9545.MOV	"é uma roça já com bastante ano, mais de 30 anos . É um cacau com material genético híbrido ... sistema agroflorestal."	Grove >30 yr , hybrid, SAF

Structured plot metadata: role `MATURE`; note "35+yr hybrid cacao agroforest (SAF)"; plus a 0.74 ha `RESTORATION` sub-plot (failed replant, lost to drought).

Synthesis — mature SAF, ~30–40+ yr (structured field: 35+).

2 · Fazenda Santa Rosa — U-06-06 (COPOPS · Uruará)

Clip	Transcription	Reading
IMG_8297.MOV	" 40 years old . 40 years old. 40 years old. 40 years old."	Mature block 40 yr (said 4x)
IMG_8307.MOV	"Oh, the 3-year-old cacao . The 2-year-old cacao is the cacao tree."	Young replant 2 & 3 yr beside the mature 40 yr

Synthesis — NOT a single age: a 40 yr mature grove PLUS a 2–3 yr young planting. (No structured plot metadata in this manifest.)

3 · Sítio Torres — N-06-66 (COOPCAO · Pacajá)

Clip	Transcription	Reading
IMG_9624.MOV	"A área de plantada é de várias idades , tem uma área mais velha lá em cima, tem mais de 20 anos , essa aqui é 4 anos , essa ali é 5 e essa aqui tem 2 ."	Age blocks 2 / 4 / 5 yr + a >20 yr block
IMG_9640.MOV	"roça... plantio que tem mais de 20 anos de desistência ... lá tem castanheira , ... tem mogno ."	>20 yr abandoned plot now holding castanheira / mogno
IMG_9664 / IMG_9668.MOV	"esse grão é mais que 100 anos " / "Essa árvore, em si, é mais do que 100 anos "	>100 yr legacy tree being preserved

Structured plot metadata: `plot\_age: "2 / 4 / 5 yr blocks plus a >20 yr block"`, `shade\_tree: "cumaru"`.

Synthesis — multi-aged grove; cacao blocks 2/4/5 yr + >20 yr; legacy hardwood trees >100 yr.

Farms with NO age data in the manifests

Exhaustive token sweep (`year / yr / anos / idade / age / planted / renovation / desist / mature`)

returned **zero** age statements in items or plots for:

Cleide · Santa Anna (Pará) · La do Sítio · Dona Rosa · Cristo Rei · CRF Anapu · Raimundo & Geniza

(Raimundo's only age hint — family cacao "since 1980" — is in the FSVP site-visit narration, not the media manifest.)

Two nuances worth flagging

- **Santa Rosa and Cacau na Veia each quote two different numbers.** Santa Rosa: "40 yr" AND "2–3 yr" (mature + young — not contradictory, but easy to misquote as one). Cacau na Veia: ">40" (IMG_9538) vs ">30" (IMG_9545); the structured field settles on **35+**.
- **The "100 years" at Sítio Torres is a legacy shade/hardwood tree, NOT a cacao tree** — don't let it land in a cacao-age average.

PART B — Summary table

Farm	Site code	Coop	Municipality	Area	Tree age	Variety (attested)
Sítio Raimundo & Geniza	U-06-07	COPOPS	Uruará	≈0.32 ha	Young renovation grove; family cacao since 1980	Trinitário × Forasteiro hybrid
Fazenda Santa Rosa	U-06-06	COPOPS	Uruará	≈4.75 ha	40 yr mature + 2–3 yr young block	"Híbrido"
Fazenda Santa Anna	B-06-58	COOPOXIN	Altamira	3 ha	"Mature" (no year)	Not recorded
Fazenda Cleide	B-06-108	COOPOXIN	Medicilândia	114 ha	Not recorded	Not recorded
La do Sítio	V-06-29	? (undetermined)	Altamira region	5.56 ha (+0.84 ha reforest.)	Not recorded	Not recorded
Fazenda Dona Rosa	pending	COOPOXIN	Medicilândia	Not recorded	"Mature" (no year)	Not recorded
Sítio Torres	N-06-66	COOPCAO	Pacajá	4.5 ha claimed / 19.14 ha walked	2 / 4 / 5 yr + >20 yr block	"Verdadeiro / híbrido" + small clonal block
Cacau na Veia	N-06-37	COOPCAO	Pacajá	30 ha (8 forest + 22 cacao)	~30–40+ yr (field: 35+)	"Híbrido"
Sítio Cristo Rei	(Pacajá/Anapu)	Copical (CEPOTX)	Anapu area	≈1 ha new plot	Newly planted (clones)	Mixed cloned varieties
CRF Anapu "Dorothy Stang"	n/a — program	CEPOTX	Anapu	n/a (school/nursery)	Seedlings	Cupuaçu (8 selections) + cacao

PART C — Back-stories

1 · Sítio Raimundo & Geniza — U-06-07

COPOPS · Uruará · visited 2026-09-03 · owner: Raimundo Silva (COPOPS Presidente) & Geniza

- **Size:** ≈0.32 ha family smallholding; centroid −3.6299, −53.6520.
- **Tree age:** family has farmed cacao **since 1980**, but the current grove is a **"renovation planting"** — **younger trees set alongside existing mature cacao**. No single average on record.
- **Variety:** Trinitário × Forasteiro hybrid (narration, IMG_8215).
- **Back-story:** Raimundo rebuilt the wooden **barcaça** as a permanent structure **"to focus on quality cacao"**; dedicated "estação de sol" thin-layer sun-drying. Organic **IBD NOP since 2006** (narration only — no certificate on file). Layout: 4 m mechanisation / 3 m irrigation rows; native shade = comaru, andiroba,

copaíba.

- **Status:** tree-planting/restoration partnership plot; **600 kg RFQ** issued 2026-09-10.

2 · Fazenda Santa Rosa — U-06-06

COPOPS · Uruará · visited 2026-09-03 · owners: Antônio & Graça

- **Size:** ≈4.75 ha family plot, Transamazônica corridor.
- **Tree age:** 40 yr mature grove + a 2–3 yr young block; mature cauliflory trees, healthy canopy.
- **Variety:** "híbrido" in an SAF (agroforestry) system.
- **Back-story:** managed **regeneratively with native shade and ground cover**; organic under the COPOPS/CEPOTX (IBD NOP) network.

3 · Fazenda Santa Anna — B-06-58

COOPOXIN · Altamira · visited 2026-08-30 · owner: Ana Lucia Araujo de Sousa

- **Size:** 3 ha per CEPOTX registration. **Tree age:** "mature" — no year. **Variety:** not recorded.
- **Back-story / practices:** mature cacao, **Pods on trunks** (cauliflory), healthy canopy, no visible disease. **Wooden fermentation boxes turned by hand on a 5–7 day protocol**; open-sided drying shed; thin-layer sun drying.
- **Discrepancy:** DAO holds **B-06-58**; the COOPOXIN roster holds **B-06-56** (Ana Lúcia Araújo de Souza) — same person, one digit apart (6/8 misread); awaiting CEPOTX confirmation.

4 · Fazenda Cleide — B-06-108

COOPOXIN · Medicilândia · visited 2026-09-08 (post-construction) · owners: Cleide Maris Suk & Marcelo

- **Size:** 114 ha — the largest property in the cluster. Tree age / variety: not recorded.
- **Back-story:** visited **after facility construction completed** — **equipment operational**: fermentation tanks, roaster, winnowing & cracking, melanger, a **cacao-juice ("honey") press**, chocolate moulding, cold-hold fridge and storage. The estate + processing anchor of the COOPOXIN tier.

5 · La do Sítio — V-06-29

Coop undetermined · Altamira region · visited 2026-09-07 · owner: Paulo Barbosa do Nascimento

- **Size:** 5.56 ha + 0.84 ha of reforestation sub-plots. **Tree age / variety:** not recorded.
- **Back-story:** the story is the **build-out** — a new bean-to-bar facility (stage 1): **ATF FPR-20N PLUS stainless roaster**, a compact **cracker/winnowing**, and a bar-making **cold-hold fridge**. Melanger, tempering and moulding are the **next stage** and were **not yet installed**. Currently producing roasted/cracked nibs only.

6 · Fazenda Dona Rosa — pending code

COOPOXIN · Medicilândia · visited 2026-09-04 · owner: Rosa Wronski

- **Size / age / variety:** not recorded ("mature" grove, no year).
- **Back-story:** Rosa runs "**Dona Rosa Chocolates**" (@donarosachocolate) — a **craft / bean-to-bar-tier** property. Evening grove walk: mature pod-laden trees, healthy canopy, no disease or rot. On-farm: wooden fermentation box, drying platform/secadero, a **countertop roaster oven**, and a **stainless-steel melanger** — she makes her own chocolate on site.
- **Flag:** site code **still to be assigned by CEPOTX**.

7 · Sítio Torres — N-06-66

COOPCAO · Pacajá · visited 2026-09-09 (12:33–16:40 local) · owner: Alexandre (CoopCao director-coordinator)

- **Size:** 4.5 ha claimed; walk hull 19.14 ha (nursery + mature blocks); plot row = 19.01 ha, `proposed/approx`.
- **Tree age:** 2 / 4 / 5 yr blocks + a >20 yr block; legacy hardwood trees >100 yr (castanheira, mogno).
- **Variety:** cacao "**verdadeiro / híbrido**" + a small **clonal block**; shade = **cumaru**.
- **Back-story:** source zip `...\_farm\_alessandro\_director\_coopcao.zip` → owner **Alexandre**, a **CoopCao director-coordinator** (coop has 8 registered properties). Sampled ~120 kg; target first lot 600 kg. Site code N-06-66 **governor-confirmed 2026-09-10**.

8 · Cacao na Veia — N-06-37

COOPCAO · Pacajá · visited 2026-09-09 · owner: Jader Adriano da Silva Santos (CEPOTX President)

- **Size:** 30 ha claimed — 8 ha forest reserve + 22 ha cacao (~22,000 plants).
- **Tree age:** ~30–40+ yr (structured field: 35+) — the oldest grove in the set. **Variety:** "híbrido" in an SAF.
- **Back-story:** the CEPOTX-president family's SAF — the network's flagship established agroforestry holding. Also carries a 0.74 ha **failed reforestation patch** (cacao + forest species lost to drought; needs replanting).

9 · Sítio Cristo Rei — Anapu area

Copical (affiliated with CEPOTX) · visited 2026-09-09 · owner: Edinaldo

- **Size:** new plot ≈1 ha, ≈1,000 trees. **Tree age:** newly planted — **1,300 cloned cacao plants**. **Variety:** mixed cloned varieties.
- **Back-story:** land previously used for cattle by the former owner, now being converted to cacao under an agroforestry system — a **generational handover moment**. Irrigation system already up and running (rows of catingueira). Media tagged Anapu/Pará.

10 · CRF Anapu "Dorothy Stang" — a program, not a farm

CEPOTX network · Anapu, Pará · visited 2026-09-09

- **Type:** Casa Familiar Rural — a rural family school (*pedagogia da alternância*) on the Rodovia Transamazônica. **Not a cacao farm or plot** — no site code, no polygon.

- **Back-story:** an Agroverse/SunMint program partner. On-site **nursery**; schoolchildren plant trees that feed into the system registry; symbolic support (~R\$5/plant every 6 months). Nursery features **cupuaçu** — **8 selected types** plus cacao. Cross-indexed with the `jediellcio` media (CEPOTX técnico/diretoria).

PART D — "Alessandro farm in Anapu" — disambiguation needed

No farm exists under that exact name in our records. Mapping the two candidates:

Candidate	Evidence	Location	Age	Variety
Sítio Torres	source zip `..._farm_alessandro_director_coopcao.zip` → Alexandre , CoopCao director	Pacajá (not Anapu)	2/4/5 yr + >20 yr block	verdadeiro/híbrido + clonal
Sítio Cristo Rei	media captions tag Anapu ; owner Edinaldo , Copical	Anapu area	newly planted clones	mixed clones

- The only "**Alessandro/Alexandre**" in the data is the **Sítio Torres** owner — but Torres is in **Pacajá**.
- **Anapu** itself appears only as (a) the **CRF Anapu school/program**, and (b) **media-caption tags** on the **Cristo Rei** visit.

Data gaps

- **Average tree age** on record for only **3 farms** (Cacau na Veia, Sítio Torres, Santa Rosa); Raimundo has a family-timeline hint (1980). The rest are "mature" or unrecorded.
- **Variety** is **farmer-attested, not lab-verified**; several farms "not recorded".
- **Boundaries** are `approx` pending CAR/INCRA or a boundary walk.
- **Organic (IBD NOP)** claim is narration-sourced — **no certificate on file**.
- **Site codes** pending for **Fazenda Dona Rosa**; **B-06-56 vs B-06-58** discrepancy open.
