

Zach Roth — Program Runner Brief

Aora × Agroverse Cacao Rainforest Adventure

Compiled by Sophia Truesight | TrueSight DAO | July 2025

1. Zach Roth — Profile Summary

Name: Zachary Roth

Current Role: Potrero Capital (US-based)

Location: United States

Connections: 500+ | Followers: 3,054

Key Background:

- Led the complete redesign and rebuild of **PlayStation.com**
- Certifications: PMP, Certified Scrum Master, CCNP, Master Project Manager
- Languages: English (native), Spanish (limited working proficiency)
- Volunteers tutoring ESL students from Mexico and Guatemala
- Active in Japan-focused events (FINOLAB, Asian Financial Forum, Japanese enterprise/startup events) and AI/tech topics
- Has expressed **openness to relocate to China long-term** to run the program

2. What the Program Is About

Event: Aora × Agroverse Cacao Rainforest Adventure

Type: Immersive children's educational event (TEDx-style, Mystic Manor-benchmarked)

Audience: 10-15 seed families (parents + children aged 6-12)

Timing: Mid-to-late July 2025 (pending three-party confirmation)

Venue: Indoor, air-conditioned space in China

The Core Product: A configurable, replicable event engine — not a one-off. After cacao, the same skeleton can be used for tea, honey, cotton, and other themes.

The Narrative:

- Gary = Guardian of the Cacao Rainforest
- Aora Kuku = the first Aora nature spirit (clue character)
- Children create their own Aora companion online → attend the event → continue the story online after

The 7 Acts (~90 minutes onsite):

1. Prologue — Identity transformation at Aora Certification Station
2. Act One — Rainforest Gate opens, children enter

3. Act Two — Sensory Rainforest (4 agroforestry stations: smell, touch, sight, hearing)
4. Act Three — Expedition Team Formation (send Aora into the rainforest)
5. Act Four — The Great Bean Adventure (supply chain floor board game, ~28 min)
6. Act Five — Magic Workshop (make chocolate by hand)
7. Starlit Campfire — Gary shares his true story
8. Epilogue — Certificates, photos, online continuation reminder

The Great Bean Adventure Board Game:

- ~4m × 3m floor map, 15 children playing simultaneously
- 6 stations: fermentation, drying, transport, fork road (Fair Trade choice), chocolate factory
- Green cards = cooperative model; orange-yellow cards = commodity model
- Non-judgmental — children discover differences through experience

The Cacao Explorer Gift Set:

- Chocolate mold, Fair Trade cacao starter, exploration tools, Aora character card with QR code
- QR code links to child's latest picture book (online continuation loop)

3. What's Expected of the Program Runner

The program runner is responsible for **ongoing delivery** of the event once the program is finalized. This includes:

- **Running the program** as and when sessions need to take place
- **Onsite facilitation** — leading children through the 7-act experience
- **Material management** — physical teaching aids, props, Gift Set samples
- **Quality control** — maintaining the TEDx-level experience standards
- **Coordination** with Liz (TEDxSSL operator), Teacher Evan (Educational Advisor), and Gary

Two staffing options were discussed:

1. **Jerri** (works for Liz) — runs the program
2. **Zach Roth** — US-based, willing to relocate to China long-term

4. Key Decisions Still Pending

Before the program lands on Zach's plate, the following need to be resolved:

#	Decision	Status	Who Decides
1	Does Evan want someone on our side to run the program?	Needs clarification	Evan

#	Decision	Status	Who Decides
2	Budget for ongoing program operation	Needs to be asked — does Evan have a budget in mind?	Evan
3	Which option: Jerri or Zach?	Depends on Liz's plans for Gary and Jerri	Liz
4	Final program content sign-off	After iteration with Dr Ye and Evan's feedback	Dr Ye + Evan
5	Three-party confirmation on July date	Pending Liz, Teacher Evan, Gary	All three
6	Technical plan lock-in (1C vs 1D)	Depends on supplier availability by July	Liz + supplier
7	Gift Set delivery timeline	Pre-sale/preview model — estimated delivery after pre-order needs clarity	Liz + Evan

5. Expenses & Relocation

Zach needs to figure for himself:

- What his **cost of living** would be to relocate to China
- What he needs to **live comfortably** there long-term

How this gets funded:

- If Evan wants someone on our side to run the ongoing programs and has a budget for it
- Zach's living expenses can be **baked into the ongoing operating expenses** as part of that budget
- This is a conversation between Zach and the decision-makers (Liz/Evan)

6. Compensation — Token Economics

For time spent running the programs, Zach will be compensated in **TDG tokens** based on the current DAO economics:

- Contributions are recorded as **[CONTRIBUTION EVENT]** submissions to the DAO ledger
- Token issuance follows the DAO's standard contributor compensation model
- The exact TDG rate per session/program will be determined once the budget and scope are finalized

7. Next Steps

1. **Clarify with Evan** — does he want someone on our side to run the program, and does he have a budget?

2. **Zach to assess** — his own cost of living for relocating to China
3. **Liz to decide** — Jerri or Zach as the program runner
4. **Finalize program** — iterate with Dr Ye and Evan until satisfied
5. **Confirm July date** — three-party sign-off
6. **Lock in technical plan** — supplier check for 1C or fallback to 1D
