

GACC Registration Requirements

Brazil → China (Dongguan) Cacao Import Lane

Prepared for Jerri / Ling — 16 June 2026

Overview

Every food item imported into China requires the manufacturer to have a **GACC registration number** from China Customs (General Administration of Customs of China). One product, one registration. Without it, customs clearance cannot proceed.

Effective date: GACC Decree No. 280 takes effect **June 1, 2026**, replacing Decree No. 248. Existing valid registrations carry over.

Key change for cocoa: Under Decree No. 280, **unroasted cocoa beans** have been **removed from the "Official Recommendation" list** (18→17 categories). This means cocoa/cacao products now follow **Pathway 2: Self-Application Registration** — faster and simpler than before.

A. Supplier Info — Black King

Field	Value
Company Name	MATHEUS REIS PEREIRA (trading as BLACK KING)
Legal Form	Empresário Individual (Sole Proprietor)
Brazil Registration (CNPJ)	50.042.585/0001-80
DUNS Number	628340898
FDA FFR Number	19088052616
Contact Person	Matheus Reis Pereira
Phone	+55 73 99109-0002 (WhatsApp)
Email	theus.reis.ssa@gmail.com
Address	Av. Tancredo Neves, 4900, Quadra H, Casa 9, Nossa Senhora da Vitória, Ilhéus, BA, 45655-650, Brazil
GACC Registration	NOT YET OBTAINED — application needed (3–6 months estimated)

GACC Registration Pathway for Black King

Under Decree No. 280, unroasted cocoa beans and processed cacao products fall under **Pathway 2: Self-Application Registration** (removed from the official recommendation list). Black King can apply directly via the **CIFER system** (cifer.singlewindow.cn) without needing a recommendation letter from MAPA

(Brazilian Ministry of Agriculture).

However, if any products are classified as **processed cacao** (nibs, mass, powder, tea), they may fall under different categories. Each distinct product type needs its own registration.

B. Product Details

Category A — Event Samples (small quantity, promotional)

Item	Qty	Est. Net Weight	Est. Gross Weight	Packaging
Ceremonial Cacao Pouch 200g	10	2 kg	2.5 kg	Retail pouch
Cacao Nibs Kraft Pouch 8oz	10	2.3 kg	3 kg	Retail pouch
Cacao Mass Bar 500g	5	2.5 kg	3 kg	Wrapped bar
Cacao Tea (KG)	2	2 kg	2.5 kg	Vacuum bag
Total	27	~8.8 kg	~11 kg	Mixed

Est. Declared Value: ~\$200–300 USD (sample / no commercial value)

Category B — Commercial Goods

Item	Qty	Est. Net Weight	Est. Gross Weight	Packaging
Cacao Nibs Kraft Pouch 8oz	137	31.1 kg	38 kg	Retail pouches in cartons
Cacao Husk (KG)	20	20 kg	22 kg	Vacuum bags
Cacao Mass Bar 500g	37	18.5 kg	22 kg	Wrapped bars in cartons
Cacao Nibs (KG) — Main	80	80 kg	88 kg	Vacuum bags
Cacao Almonds (KG) — AGL8	10	10 kg	11 kg	Vacuum bags
Cacao Tea (KG) — AGL8	12	12 kg	13 kg	Vacuum bags
Ceremonial Cacao Pouch 200g	169	33.8 kg	42 kg	Retail pouches in cartons
Cacao Almonds (KG) — AGL13	15	15 kg	17 kg	Vacuum bags

GACC Registration Requirements — Black King to China (Dongguan)

Item	Qty	Est. Net Weight	Est. Gross Weight	Packaging
Cacao Nibs (KG) — AGL13	100	100 kg	110 kg	Vacuum bags
Cacao Tea (KG) — AGL13	21	21 kg	23 kg	Vacuum bags
Cacao Almonds (KG) — AGL14	10	10 kg	11 kg	Vacuum bags
Total	611	~351.4 kg	~397 kg	Mixed

Est. Declared Value: ~\$7,032.53 USD (FOB)

C. Clearance Documents Required

#	Document	Notes
1	Certificate of Origin	Issued by Brazilian authorities (Federacao das Industrias / CAMEX). Proves Brazilian origin for China-Brazil trade.
2	Health Certificate / Sanitary Certificate	Issued by MAPA (Ministério da Agricultura, Pecuária e Abastecimento) — Brazil's Ministry of Agriculture.
3	Production / Packaging Date Certificate	Self-certified by Black King. States production date, packaging date, and best-before/expiry date.
4	Ingredient List	Full list of ingredients in descending order of proportion. For single-ingredient products (cacao nibs, almonds), this is straightforward.
5	Composition / Test Report	Lab analysis showing nutritional composition, heavy metals, microbiological testing. Can be from a Brazilian accredited lab.
6	Bilingual Labels (Chinese + English)	Required for pre-packaged food. Each product needs a Chinese label affixed to the packaging showing: product name in Chinese, ingredients, net weight, producer name & address, GACC registration number, production date, shelf life, storage conditions, country of origin.

#	Document	Notes
7	GACC Registration Number	The manufacturer's GACC number (Black King) — must be obtained first . This number must appear on the Chinese label.
8	Phytosanitary Certificate	For unroasted cocoa beans/almonds — proves pest-free status. Issued by MAPA.
9	Commercial Invoice & Packing List	Standard export docs. Already prepared for the US shipment.
10	Bill of Lading / Air Waybill	Transport document for the Dongguan route.

D. GACC Registration Process — Step by Step

Step 1: Determine Registration Pathway

Under Decree No. 280 (effective June 1, 2026):

- **Unroasted cocoa beans (NCM 1801.00.00): Self-application** (Pathway 2) — removed from official recommendation list. Apply directly via CIPHER.
- **Processed cacao (nibs, mass, husk, tea — NCM 1803.10.00, 2106.90.00):** Likely also **Self-application** (Pathway 2) as processed plant-based foods. Confirm with GACC consultant.

Step 2: Register on CIPHER System

1. Go to cifer.singlewindow.cn
2. Create an account as an overseas manufacturer
3. Submit:
 - Business license / CNPJ registration certificate (translated to Chinese)
 - Food safety management system documentation (HACCP, GMP, or equivalent)
 - Product list with descriptions
 - Compliance declaration
4. GACC reviews and issues registration number (18-digit code)
5. **Timeline:** 3–6 months for first-time registration

Step 3: Prepare Chinese Labels

Once GACC number is obtained, prepare bilingual labels for each product. The GACC number must be printed on the label.

Step 4: Ship with Complete Documentation

Present all documents from Section C at customs clearance in Dongguan.

E. Timeline & Urgency

Milestone	Estimated Timeline
GACC registration application submitted	ASAP (today)
GACC registration approved	3–6 months
Bilingual labels prepared	2–4 weeks (can start in parallel)
Health Certificate from MAPA	2–4 weeks
Lab testing / composition report	2–4 weeks
First shipment ready	~6–8 months from start

Recommendation: Start GACC registration **immediately** — it's the critical path item. The 3–6 month timeline means we should submit the application now even if the shipment isn't planned until later.

F. Fallback: Coopercabruca Route

If Black King's GACC registration is delayed, **Coopercabruca** (CNPJ 31.948.811/0001-42, Itabuna, BA) is an alternative supplier that already has IE, NF-e capability, and FDA FSVP clearance. They would also need GACC registration, but as a cooperative with established food safety systems, their application may be faster.

G. Key Contacts for This Lane

Role	Name	Contact
China Logistics Coordinator	Jerri / Ling	(via Gary)
Brazil Supplier (Black King)	Matheus Reis	theus.reis.ssa@gmail.com / +55 73 99109-0002
Brazil Supplier (Coopercabruca fallback)	Orlantides Santos	coopercabruca@gmail.com / +55 73 9138-8884
Freight Forwarder (Brazil)	Graziela Vedana (Seacos)	Graziela@5cl.rs
GACC Registration Consultant	TBD — recommend engaging a China regulatory consultant	—

Prepared by Sophia Truesight (TrueSight DAO Autopilot) — 16 June 2026

Based on GACC Decree No. 280, Announcement No. 27 (March 2026), and Black King entity profile from fda_fsdp.
