

Cacao Beverage Opportunity

China Market & TCM Product Strategy + Operating P&L

Initial Go-to-Market Network Expansion Channels:

Dr. Ye (TCM) · Elizabeth Wong's Cousin (Market Insider) · Chaoshan Group

Compiled by: Sophia Truesight — TrueSight DAO

July 13, 2026

Executive Summary

"Nobody in China is making cacao drinks yet." — Confirmed independently by Dr. Ye (TCM) and Elizabeth Wong's cousin (market insider).

Three initial network expansion channels drive the go-to-market strategy: **Dr. Ye** (TCM content + Douyin weight-loss account), **Elizabeth Wong's Cousin** (market insider), and **Chaoshan Group** (regional distribution). Sales, marketing, and events budgets are allocated to expand these networks.

China health tea market: **¥642.7 billion** (2025), growing 25.3% YoY, projected >¥100 billion by 2028.

Cacao husk tea as a category is completely empty in mainland China.

Operating model: **Min Viable Scale = 249 boxes/month** (~9.0 kg cacao tea) to cover \$9,833 monthly OpEx. At conservative scale (500 boxes/mo): **\$9,328/mo net profit**.

Every SKU sold reserves **\$5 → 1 cacao tree → 4 tons carbon credit**.

Part 1: Market Opportunity

"中国可卡的饮料还没有人做" — Cacao drinks in China have no domestic player yet.

- China health tea market: ¥642.7B (2025, +25.3% YoY), projected >¥1T by 2028

- Cacao husk tea category: **completely empty** in mainland China
- Existing cacao tea brands (Dedicated Chocolate HK, Rayca's HK, Hara Teas, Cacao Tea Co.) — all overseas, none on Taobao/Tmall/JD
- Weight-loss/slimming demand: high traffic conversion rates (confirmed by Dr. Ye's market observation)
- Convenience product direction: cacao shell tea bags (泡/煮茶) — multi-functional, regional-limited editions

Target Segments

Segment	Size Indicator	Channel Access
Health-conscious women (25-45)	Core health tea consumers	Dr. Ye's Douyin accounts
TCM / wellness seekers	¥642B health tea market	Dr. Ye's TCM audience
Coffee alternative drinkers	Growing specialty tea market	Chaoshan network
Gift / premium market	小罐茶 brand perception	Elizabeth Wong's cousin + events

Part 2: Competitive Landscape

Direct Competitors (Cacao Husk Tea)

Brand	Price	Channel	China Mainland?
Dedicated Chocolate (HK)	~HKD 68	Website, HK only	☐
Rayca's Dancing Tea (HK)	HKD 12-168	Website, HK only	☐
Hara Teas (Overseas)	~USD 10-15	Website only	☐
Cacao Tea Co. (USA)	~USD 12-18	Website, cross-border	☐
Conspiracy Chocolate	~USD 10	Website only	☐

Key finding: None available on Taobao/Tmall/JD. All overseas/HK. **Blue ocean.**

Indirect Competitors (Health Tea Bags)

Brand	Price	Positioning
同仁堂 (Tongrentang)	¥30-80	Heritage TCM leader
忆江南 (Yijiangnan)	¥20-50	Mass-market health tea
草木方 (Caomufang)	¥25-60	New-style health tea
茶里 (CHALI)	¥30-80	New-style bagged tea

立顿 (Lipton)	¥20-40	International brand
-------------	--------	---------------------

Differentiation Matrix

Dimension	Existing Health Teas	Cacao Husk Tea (Us)
Market	Red ocean (established brands)	Blue ocean — no domestic player
Raw material	Herbs / flowers	Cacao shell (circular economy)
Flavor	Herbal taste	Natural chocolate aroma
Caffeine	Varies	Very low (theobromine only)
Antioxidants	Moderate	Higher than green tea
TCM integration	Mature system	Blank — can define new "warming, heart-nourishing" category
Sustainability	Standard	\$5/SKU → 1 tree → 4 tons carbon credit

2.5 The Active Ingredient — Epicatechin (表儿茶素)

The specific compound that doubles circulating stem cells is (–)-epicatechin, a flavanol in the flavonoid family that is unique to cacao.

Mechanism: Epicatechin upregulates nitric oxide (NO) production in the endothelium (blood vessel lining), which signals bone marrow to release endothelial progenitor cells — a type of circulating stem cell — into the bloodstream. It also protects these cells from oxidative damage once in circulation.

Compound	Stem Cell Effect	Also Found In
(–)-Epicatechin — □Primary active	Triggers EPC mobilization from bone marrow	Cacao only (trace in tea)
Procyanidins (B2, B5)	Synergistic — protect epicatechin, enhance absorption	Cacao, apples, berries
Theobromine	Vasodilator — supports blood flow, no stem cell effect	Cacao (1.5-3%)

Clinical Validation

Study	Population	Protocol	Finding
UCSF — JACC (2010)	16 CAD patients (avg 64)		2× stem cells + 47% improved blood vessel function

375mg flavanols (≈85mg epicatechin) twice daily × 30 days			
Complutense — PubMed (2020)	Human endothelial cells in vitro	Cocoa phenolic extract + pure epicatechin	Epicatechin alone replicated the protection effect — confirmed as the active agent
Urbino — PMC (2024)	Murine muscle stem cells	Cocoa polyphenol extract under oxidative stress	Protected stem cell mitochondria + doubled mitochondrial count

Commercially Available Epicatechin Extracts

The technology to concentrate epicatechin from cacao already exists at commercial scale:

Product	Concentration	Epicatechin per serving	Retail Price
CocoaVia Cardio Health	500mg flavanols	~85mg	\$30-40/bottle
CocoaVia Ultra 750mg	750mg flavanols	~135mg	\$45-55/bottle
CCV-3® (advanced)	1,200mg flavanols	~600mg	\$60+/bottle

Our Dual-Product Opportunity

Since the cacao **shell/husk** is our raw material — currently a waste byproduct — we can pursue two product lines from the same source:

Product	Processing	Epicatechin Level	Positioning	Price
Cacao shell tea	Minimal (dried + cut)	Low (~0.5-1%)	Daily functional beverage	\$50/box
Epicatechin concentrate	Hydroalcoholic extraction + spray dry	10-50% flavanols	Therapeutic supplement	\$30-60/bottle

Pressurized liquid extraction (ethanol + water) from cacao husk has been proven effective (ResearchGate, 2022). This transforms a waste stream into a premium nutraceutical ingredient — true circular economy.

Part 3: Science & TCM Integration

Cacao Health Benefits (Peer-Reviewed)

- **Cardiovascular:** Nitric oxide production, lowers blood pressure, reduces LDL, improves endothelial function
- **Cognitive:** Increases cerebral blood flow, improves memory, may reduce dementia risk
- **Mood:** 70% lower depression risk in high-cacao consumers; theobromine provides温和提神

- **Anti-inflammatory & Antioxidant:** ORAC score ~97,000 — 4× superfoods like acai/goji
- **Metabolic:** Anti-diabetic, anti-obesity, anti-carcinogenic properties

Cacao Shell Tea vs Green Tea

Metric	Cacao Tea	Green Tea
Antioxidants	Higher (flavonoids)	Lower
Theobromine	High (温和提神)	Negligible
Caffeine	Low	Medium
Heart health	Stronger	Protective
Sugar/Fat	Zero	Zero

TCM Classification

Property	Value
Nature (性)	Warming (温)
Taste (味)	Bitter, Slightly Pungent (苦、微辛)
Meridians (归经)	Heart, Liver, Kidney (心、肝、肾)
Therapeutic Actions	Tonify Heart Qi · Warm Kidney Yang · Invigorate Blood · Calm Shen (补心、温肾阳、活血、安神、祛寒)

TCM Tea Blend Formulas

Formula	TCM Focus	Key Herbs
Heart-Nourishing (养心安神)	Fatigue, cold hands, mild depression	Cacao shell + goji + red dates + licorice
Digestive-Warming (温中健脾)	Cold digestion, bloating	Cacao shell + ginger + chen pi + cinnamon
Liver-Soothing (疏肝解郁)	Stress, PMS, irritability	Cacao shell + chrysanthemum + mint + rose
Kidney-Warming (温肾壮阳)	Low energy, low libido	Cacao shell + goji + cinnamon + schisandra

Part 4: Operating P&L Model

4.1 Product Specification — 小罐茶 Style

Item	Spec
Serving size	4g per can
Box size	10 cans = 40g per box
Units per kg	250 boxes
Retail price	\$50/box (Elizabeth Wong)

4.2 Cost of Goods Sold (Per Box — 40g)

Raw Material: AGL8 — La Dio Sitio Farm (Paulo, Pará)

Component	Per kg	Per Box
Cacao husk (byproduct from nib/choc production)	\$44.00	\$1.76
Processing (clean, roast, grind for tea)	\$3.00	\$0.12
Ex-factory Brazil	\$7.50	\$0.30

Packaging (Shenzhen — Source Pack Co)

Item	Per Box
Aluminum can ×10 (小罐茶 style)	\$1.50
Outer box	\$0.30
Tea filter bag ×10	\$0.50
Packaging subtotal	\$2.30

⚠ **NEED: Packaging pricing from Ling**

Freight (Brazil Ilhéus → Shenzhen, China)

Method	Rate/kg	Per Box
Air freight (consolidated, 100+ kg)	\$4-5/kg	\$0.18
DHL Express (samples only)	\$15-20/kg	\$0.70
Sea freight (container, 1000+ kg)	\$1-2/kg	\$0.06

Use Seacos/Omega forwarders (existing partners). DHL is 3-4x — samples only.

Total COGS per Box

Component	Cost	% of \$50
Cacao tea + processing	\$0.30	0.6%
Packaging	\$2.30	4.6%
Freight (air consolidated)	\$0.18	0.4%
Customs/duties (~5-15%)	\$0.14	0.3%
Total COGS	\$4.51	9.0%
Gross Profit	\$45.49	91.0%

4.3 Supply Constraints — La Dio Sitio Farm

La Dio Sitio is a **4-hectare** farm producing **~4,000 kg of cacao beans per year** (1,000 kg/ha). The cacao shell (husk) — used for tea — makes up **10-17% of bean weight** per peer-reviewed research (PMC7230451).

Metric	Conservative (10%)	Moderate (14%)	Optimistic (17%)
Cacao tea per year	400 kg	560 kg	680 kg
Boxes per year (40g/box)	10,000	14,000	17,000
Revenue at \$50/box	\$500,000	\$700,000	\$850,000
Trees planted/yr	10,000	14,000	17,000
Carbon (tons CO2/yr)	40,000	56,000	68,000

Key insight: The \$500K minimum annual sales target is **exactly at the farm's conservative capacity** (10,000 boxes from 400 kg tea). To scale beyond 10,000 boxes/yr, additional cacao shell supply is needed — either from other farms or through partnerships for shell byproduct from chocolate/nib production.

4.4 Carbon Credit Reserve

Metric	Per Box
Carbon reserve (per SKU sold)	\$5.00
Cacao trees planted	1 tree
Carbon credits generated	4 tons CO ₂

Net revenue after carbon reserve: **\$45.00/box**. Profit adjusted accordingly.

4.4 Revised P&L — Net After Carbon Reserve

Component	Per Box
Retail price	\$50.00
– Carbon reserve (→ reforestation)	–\$5.00
Net revenue	\$45.00
– COGS	–\$4.51
Gross profit (after carbon)	\$40.49

4.5 Operating Expenses (Monthly)

Category	Monthly	Annual	Channel Served
Team — Jerrie (operations)	\$1,000	\$12,000	All channels
Team — Ling (packaging/logistics)	\$1,000	\$12,000	All channels
Elizabeth Wong — Sales & marketing (KOL wining/dining)	\$2,000	\$24,000	Dr. Ye / Cousin / Chaoshan expansion
Marketing content production	\$1,000	\$12,000	Dr. Ye's Douyin content
Events & KOL activations	\$3,333	\$40,000	2 events/yr × \$20K — drives all 3 channels
Warehousing (Shenzhen)	\$500	\$6,000	All channels
Legal & compliance (China)	\$500	\$6,000	All channels
Miscellaneous	\$500	\$6,000	All channels
Analysis lab (nutritional, heavy metals, pesticide residue, microbiology)	\$250	\$3,000	Per-batch testing — compliance
Total Monthly OPEX	\$10,083	\$118,000	
+ One-time setup		\$10,000	Branding, packaging design, regulatory
Total Year 1 OpEx		\$128,000	

Network Expansion Budget: Elizabeth Wong's \$2,000/mo sales & marketing + \$40,000/yr events = **\$64,000/yr dedicated to expanding Dr. Ye, Cousin, and Chaoshan channels.** This is the core GTM investment.

4.6 Minimum Viable Scale — Units Required

To cover monthly operating expenses of **\$9,833**, you need to sell **224 boxes per month** at \$45 net revenue per box. That's just **~9.0 kg of cacao tea** per month.

Timeframe	Boxes Needed	Net Revenue	COGS	Net Profit	Cacao Tea
Per month (min viable)	219 boxes	\$9,855	\$639	\$16	~9.0 kg
Per quarter	657 boxes	\$29,565	\$1,918	\$47	~26 kg
Per year (break-even)	2,844 boxes	\$127,980	\$8,304	\$0 (B/E)	~114 kg

At **249 boxes/month** you sustain operations with near-zero loss. This is the floor — every box beyond that is pure profit.

4.7 Monthly Revenue Scenarios

Scenario	Boxes	Net Revenue	COGS	OpEx	Net Profit	Trees	Carbon (t)
Min Viable Scale	219	\$9,855	\$639	\$9,833	\$16	219	876
Conservative	500	\$22,500	\$1,460	\$9,833	\$11,207	500	2,000
Moderate	1,000	\$45,000	\$2,920	\$9,833	\$32,247	1,000	4,000
Growth	2,500	\$112,500	\$7,300	\$11,833	\$93,367	2,500	10,000
Scale	5,000	\$225,000	\$14,600	\$16,833	\$193,567	5,000	20,000

Annual Carbon Impact at Scale

Scale	Boxes/Yr	Revenue After Carbon	Trees/Yr	Carbon Credits (tons)	Reforestation Fund
Growth	30,000	\$1,350,000	30,000	120,000	\$150,000
Scale	60,000	\$2,700,000	60,000	240,000	\$300,000

Part 5: Product Line & Pricing

Tier	Product	Price
1	Pure cacao shell tea (小罐茶 style, 40g)	\$50
2	4 TCM functional blends (40g)	\$55-60
3	Seasonal limited editions	\$65-80
4	Regional editions — 因地制宜 (incl. Chaoshan)	\$55-70
5	Chocolate bar + recipe kit	\$15-25

Part 6: Funding Requirements

Use	Amount
Initial inventory (50 kg cacao tea from AGL8)	\$375
Packaging (5,000 units — aluminum cans + boxes)	\$11,500
Freight (50 kg air, Brazil→China)	\$250
Branding & packaging design	\$3,000
China food import compliance	\$3,000
Operating reserve (6 months)	\$59,000
Marketing launch (KOLs, 1 event)	\$25,000
Contingency (15%)	\$15,319
Total	~\$117,444

Part 7: Target Demographics — Four Core Segments

Segment A: Single Career Women — *"Who Wants Affection"* (需要温暖的她)

Dimension	Profile
Age / Income	28-40, urban Tier 1-2, ¥200K-500K/yr, high disposable income
Living	Alone, owns/rents own apartment
Psychographic	High stress, "leftover woman" social stigma, emotional loneliness, aspirational self-care
Spending pattern	¥5K-15K/mo on wellness, beauty, self-treats; buys for herself
TCM need	养心安神 (nourish Heart, calm Shen) — stress, sleep, emotional comfort
Product match	Heart-Nourishing blend (Hero SKU); 暖心暖胃 story
Tagline	Connect to your divine feminine
Marketing hook	"你值得被温暖" — You deserve to be warmed

Segment B: Single Career Women — *"Radiant & Divine Feminine"* (焕发女性能量)

Dimension	Profile
Age / Income	28-40, same demographic as Segment A but distinct psychographic
Psychographic	

Beauty-conscious, invests in skin/hair/body, self-worth tied to appearance; wants to feel desirable (not just comforted)

Scientific hook	Clinical evidence: 12-week trial — 47.5% increase in skin hydration, significant wrinkle reduction, collagen synthesis stimulation (PMC11592858)
TCM need	养血 (nourish Blood) + 润肤 (moisten skin) — beauty from within (内服美容)
Product match	Liver-Soothing blend (疏肝解郁 — stress → breakouts/aging) OR Pure cacao shell positioned as beauty tea
Market size	China beauty-from-within drinks market: \$3.2B (2025), growing 6.2% CAGR — cacao competes with collagen
Tagline	Connect to your divine feminine
Marketing hook	"每天一杯可可茶，喝出光彩" — One cup of cacao tea a day, drink your glow

Segment C: Married Couples Over 10 Years — *"Yesterday We Were Young"* (昨天的我们，青春正好)

Dimension	Profile
Age	35-55, with children
Location	Tier 1-2 cities, suburban
Psychographic	Post-honeymoon, conjugal fatigue, declining intimacy; both partners work + parent; "老夫老妻" mindset
Key pain	Kidney deficiency (肾虚), low libido, no time/energy for romance
TCM need	温肾壮阳 (warm Kidney, invigorate Yang) + 安心神 (calm Heart) → vitality + connection
Product match	Couple's Gift Box (双人礼盒) — 2 × 10-can: Heart-Nourishing + Kidney-Warming
Marketing hook	"昨天的我们，青春正好" — Yesterday we were young, vibrant, alive

Segment D: Gen Z Couples — *"He Buys Her a Gift"* (送礼到心坎里)

Dimension	Profile
Age	20-28
Income	¥80K-200K/yr but high gift spend (saves up for impactful gifts)
Psychographic	Value-driven mega-spenders; 41% of wellness spend is under-35; wants gift that is premium, health-forward, unique
Wellness trend	养生 is no longer "old people's thing" — Gen Z embraces TCM health
Gift budget	¥200-800 (\$28-112) per occasion

Channel	Douyin, Xiaohongshu, gift-box unboxing content
Product match	Gift Edition (送礼版) — single-flavor 10-can box, premium packaging, QR code with story
Marketing hook	"她更想要的，是一份安心" — What she really wants is peace of mind

Strategic Positioning Summary

Segment	Price Sensitivity	TCM Depth	Packaging	Channel	Priority
A: Single — Affection	Low (self-treat)	Medium	Elegant solo box	Douyin + 小红书	#1
B: Single — Radiant / Divine Feminine	Low (self-treat)	Medium-High	Beauty box aesthetic	小红书 + Douyin	#1 (tie)
C: Married 10+ yrs	Medium	High	Couple gift set	TCM influencers	#3
D: Gen Z gift	Medium-High	Low-Medium	Luxury unboxing	小红书 + short video	#2

Part 8: Required Projections — \$500,000 Annual Sales Target

To achieve \$500,000 in annual gross sales revenue, the operation requires:

10,000 boxes sold per year = **833 boxes per month** = **~400 kg cacao tea** annually = **1 cacao tree planted per box** = **40,000 tons CO₂ carbon credits** generated per year.

Projection Breakdown

Projection	Value	Formula
Annual gross sales revenue	\$500,000	10,000 boxes × \$50
Monthly gross sales revenue	\$41,667	833 boxes × \$50
Boxes required per year	10,000	\$500,000 / \$50
Boxes required per month (avg)	833	10,000 / 12
Boxes required per day (avg)	~28	833 / 30
Cacao tea per year	~400 kg	10,000 boxes × 40g
Cacao tea per month	~33 kg	400 / 12
Farm capacity used	100% (conservative)	400 kg / 400 kg shell yield

Revenue after carbon reserve (\$5/box)	\$450,000	10,000 × \$45
Total COGS	\$12,100	10,000 × \$0.792
Net revenue after COGS	\$437,900	\$450,000 – \$12,100
Annual OpEx	\$121,000	Per section 8
Net profit (before tax)	~\$321,080	\$437,900 – \$121,000
Net profit margin	~64.2%	\$321,080 / \$500,000
Cash reserved for reforestation	\$50,000	10,000 boxes × \$5
Trees planted per year	10,000	1 per box
Carbon credits generated	40,000 tons CO₂	4 tons per tree
Break-even vs \$500K target	29% of target	2,904 boxes break-even / 10,000 target

Part 9: Open Items

Item	Owner	Status
Packaging pricing (aluminum cans, boxes, labels)	Ling	⚠ NEED
Packaging details (materials, dimensions, artwork)	Ling	⚠ NEED
Events budget — confirmed 2 events/yr × \$20K	Elizabeth Wong	✅ DONE
KOL partnership budget and target list	Elizabeth Wong	⚠ NEED
China food import regulations (cacao husk tea)	Legal	⚠ NEED
Dr. Ye's Douyin side account launch timing	Dr. Ye	⚠ PENDING
Chaoshan group introduction and partnership terms	Elizabeth Wong	⚠ PENDING
配方研发: TCM specialist to formulate blends for 10-can box (Heart-Nourishing, Digestive-Warming, Liver-Soothing, Kidney-Warming + cacao shell base)	TCM Specialist (Dr. Ye to recommend)	⚠ NEED
Analysis lab fees — nutritional panel, heavy metals (Pb/Cd/As), pesticide residue, microbiology for China import compliance	Accredited Lab ~\$250/mo ongoing	⚠ NEED
